

DANIEL R. KICK, PHD

- Experience with **statistics, programming, machine learning, and deep learning.**
- Designed NIFA funded research plan ([Grant 2023-67012-39485](#)).
- Presented to scientific and general audiences over **25 times** since 2016.
- Led **4 teaching assistants** and mentored **7 research students.**
- Developed statistical tool used by **>700 students** as of 2021.

PROFESSIONAL AND RESEARCH EXPERIENCE

Present
|
2021

Research Geneticist

Jacob Washburn Lab, USDA-ARS

- Secured \$225,000 to develop “Environmentally Aware Deep Learning Based Genomic Selection And Management Optimization For Maize Yield” from the National Institute of Food and Agriculture (NIFA) ([Grant 2023-67012-39485](#)).
- Employed **deep neural networks, machine learning models, and best linear unbiased predictors** to **improve corn yield prediction accuracy** in diverse environments.
- **Communicated** with stakeholders via **11 presentations** (5 national, 3 regional, 3 outreach).
- **Mentored** 2 students conducting a high throughput root phenotyping experiment.
- **Created** and taught a **Python data visualization workshop** titled “Tools and Techniques for a Jupyter Based Scientific Workflow”.
- Completed **Software Carpentries instructor certification**, taught **R for Reproducible Scientific Analysis**, and assisted in teaching **Data Management with SQL**.
- Designed and completed a professional development curriculum with the guidance of an industry scientist via the **Bayer-University Mentoring Program**.
- Served as a **panel member** on “Next-Generation Omics” at the 2022 University of Missouri Division of Biological Sciences Retreat.

2021
|
2015

Graduate Researcher

David Schulz Lab, University of Missouri

- **Author on 6 publications:** 4 original research and 2 eLife Insight publications.
- **Assessed the efficacy of machine learning models** to identify cell identity from mRNA and contig abundances. **Applied cluster estimation, hyperparameter tuning, unsupervised machine learning, and supervised machine learning.** Identified and learned needed skills primarily through self study. Collaborated with molecular biology project lead. (see *Northcutt¹, Kick¹, et al. 2019*).
- Defined research question and experiments. **Developed novel approaches to quantify changes in cell activity.**
- Collaborated with **electrophysiologists**, assisting with data analysis.
- Collaborated with **computational neuroscientists**, contributing domain expertise.
- **Mentored 5 students** and oversaw their projects.
- Communicated results through **18 presentations** (6 national, 6 regional, 6 outreach).
- Served as a **peer mentor of 3 PhD students** in use of R for reproducible data analysis, created internal documents on same.

2021
|
2020

Lead Teaching Assistant, Animal Physiology Lab

Biological Sciences, University of Missouri

- Developed **statistics web application** used by **more than 700 students** as of 2021 with **shiny** ([source](#), [deployed](#)) for data visualization, testing assumptions, and fitting **frequentist, non-parametric, and Bayesian** models.
- Led 4 Teaching Assistants and coordinated adaptation of lab curriculum to be fully online due to COVID-19 pandemic.
- **Mentored** next Lead Teaching Assistant, created documentation on best practices.

2020
|
2018

Teaching Assistant, Animal Physiology Lab

Biological Sciences, University of Missouri

- Updated and refined curriculum, delivered lectures and ensured experiments were conducted safely, and modeled student grade distributions to identify and adjust for differences in grading.

EDUCATION

PhD: Biological Sciences

University of Missouri,
Columbia, MO (2021)

Machine Learning Methods for
Biomedical Informatics,
Quantitative Methods in the Life
Sciences, and Grant Writing

Bachelor of Science: Biology

Truman State University,
Kirksville, MO (2015)

Next Generation Sequence Data
and Analysis, Bioinformatics

Leadership role in the biological
honors society Tri-Beta

Technical Skills

📊 **R Programming** (7 years)
and experience with
tidyverse, lme4, caret,
ggplot2, shiny, & package
creation.

🐍 **Python Programming** (2
years) and experience with
pandas, numpy, plotly,
scikit-learn, keras,
pytorch.

📦 **Miscellaneous Experience**
with high performance
computing (**bash, slurm**),
virtual environments (**conda,**
singularity), version control
(**git, GitHub**), literate
programming (**Rmarkdown,**
Jupyter), crop growth
modeling (**APSIM Next**
Generation).

For a pdf with
links scan here.

- 2018 • **Curriculum Consultant, Animal Physiology Lab**
Biological Sciences, University of Missouri
• Redesigned course material to incorporate primary literature and data analysis.
- 2016
|
2015 • **Teaching Assistant, Animal Physiology Lab**
Biological Sciences, University of Missouri
• Delivered weekly lectures, ensured experiments were conducted safely, provided timely feedback on assignments.
- 2013
|
2015 • **Undergraduate Researcher**
University of Missouri, University of Connecticut, and Truman State University
• Designed a hydroponic system for maize root phenotyping – (2014-2015), Quantified retinal minor splice expression using immunohistochemistry – (2014), Measured effectiveness of oligonucleotide treatment for spinal muscular atrophy in mice – (2013).

HONORS AND AWARDS (4/5)

- 2025
|
2023 • **NIFA Fellowship (AFRI EWD)**
\$225,000 awarded over two years to create and environmentally aware deep learning genomic selection models and prepare the recipient to transition into industry [Grant # 2023-67012-39485](#).
- 2019 • **J. Perry Gustafson Award for Outstanding Graduate Research in the Life Sciences**
[This \\$2,000 award](#) is granted for the quality of their research and academic achievements.
- 2018
|
2016 • **NIH T32 Training Grant Recipient**
This provides a \$27,000 yearly stipend and \$750 yearly to facilitate presenting research at scientific conferences.
- 2015 • **Cum Laude & President's Recognition, Truman State University**

SELECTED PUBLICATIONS (SHOWING 4/9 PUBLISHED, 0/0 IN REVIEW, 0/3 IN PREP.)

- 2023 • **Ensemble of Best Linear Unbiased Predictor, Machine Learning, and Deep Learning Models Predict Maize Yield Better Than Each Model Alone**
Daniel R. Kick, Jacob D. Washburn [in Silico Plants](#)
- 2023 • **Yield Prediction Through Integration of Genetic, Environment, and Management Data Through Deep Learning**
Daniel R. Kick, Jason G. Wallace, James C. Schnable, Judith M. Kolkman, Baris Alaca, Timothy M. Beissinger, David Ertl, Sherry Flint-Garcia, Joseph L. Gage, Candice N. Hirsch, Joseph E. Knoll, Natalia de Leon, Dayane C. Lima, Danilo Moreta, Maninder P. Singh, Teclemariam Weldekidan, Jacob D. Washburn [G3: Genes, Genomes, Genetics](#)
- 2022 • **Timing dependent potentiation and depression of electrical synapses contributes to network stability in the crustacean cardiac ganglion**
Daniel R. Kick and David J. Schulz [The Journal of Neuroscience](#)
- 2019 • **Molecular profiling of single neurons of known identity in two ganglia from the crab *Cancer borealis***
Adam J. Northcutt¹, *Daniel R. Kick*¹, Adriane G. Otopalik, Benjamin M. Goetz, Rayna M. Harris, Joseph M. Santin, Hans A. Hofmann, Eve Marder, and David J. Schulz (¹ *denotes co-first authorship*) [Proceedings of the National Academy of Sciences](#)
